- All specifications refer to A4-size paper of 80gsm quality.
- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.
- The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5% cover age of A4). The actual life of each consumable will vary depending on use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.

AccurioPrint C3070L

These first Konica Minolta production systems launched under the new Accurio brand name target small to mid-size commercial printers as well as in-house print rooms and Central Reprographic Departments (CRDs). As entry-level printing systems, they offer outstanding new features including scan & print to/from USB Flash, a dual colour high speed scanner and the possibility to manage print jobs directly from the operating panel. CRDs will find it easy to adapt to changing document workflows in the company, enhance their overall productivity and to extend their range of products and services by offering new, sophisticated print products.

Outstanding Light Production Colour Device

AccurioPress C3070/C3080

High-end print controller

Versatility and reliability are now combined with the AccurioPress C3070/C3080 digital colour print system, empowering print professionals to surpass their requirements for on-demand printing. With high print speeds of 81ppm on the AccurioPress C3070/C3080 and a massive 4,399 A4 sheets per hour or 2,113 SRA3 sheets per hour, the C3080 will manage those print deadlines with ease. The performance is equally matched by the extended capabilities of long sheet duplex, up to 762mm and professional envelope printing to name but a few, whilst colour consistency is controlled at a level to provide best results, time after time.

AccurioPress C6100/C6085

Print suppliers have many challenges, one being able to drive higher efficiencies in their digital print production environment. The AccurioPress C6100 and C6085 addresses these challenges with print technologies that deliver productivity while reducing both set-up and down time. Efficiency is achieved with rated print speeds of up to 100ppm, which equates to 5,455 printed sheets per hour, with three monthly duty cycles on the C6100 of 1.8 million.

The models offer productivity with rated print speeds across a large range of media types and weights - simplex and duplex printing is possible up to 400gsm, assuring that production time is kept to a minimum in order to meet client requirements.

AccurioLabel 190

AccurioLabel 190 has been created to take centre stage on the globally-expanding digital label market. Adoption of a production printer as the engine, which represents the culmination of cutting-edge technologies amassed by Konica Minolta over a span of many years. AccurioLabel 190 contributes to business expansion by perfectly balancing customer needs from the perspectives of quality and cost.

- High image quality of 1,200 dpi,
- Maximum speed of 18.9m
- Ensures facilitation of work during procedures such as maintenance and job changes

AccurioLabel 190 digital label printer offers outstanding productivity, image quality, operability and economy, is a 'perfect fit' for new market expansion and parallel use with existing analogue machines. Label converters and commercial printers face an increasing number of print jobs for small to medium editions, which they are expected to produce in ever-shorter processing times. With conventional flexo and offset printing, it is hardly possible to produce such orders profitably. However, they can be processed easily and efficiently thanks to the flexibility of digital printing.

PageScope Net Care Device Manager

CHARACTERISTICS

Reduces administrator time and effort by managing networked output devices centrally and remotely.

You need accurate status reports and snapshots of usage, which you get with detailed monitoring based on M2M communication.

Covering a central device database and monitoring functionality, the Net Care Device Manager streamlines the complete management of all output devices in the corporate network and provides a welcome feature set to any company's IT administrator.

The Net Care Device Manager is the core element of the PageScope Enterprise Suite, which enhances and extends the capabilities with advanced output management, follow-me printing, user management, cost reporting and scan management.
